Versatile design and a wide range of applications

Design: Jessica Engelhardt

Inspired by the smooth contour of a petal, the seating shells of the Fiore collection offer a perfectly shaped basis for many different designs. The various chair frames follow this nature-inspired stylistic idiom, too: no matter if you choose a wooden frame, a steel frame or an aluminum frame, four-legged frame or a swivel chair, all models can be customised to meet individual needs.

FI 7550
+ Armrests AB31APO

Lightness meets precision – an ideal symbiosis for all meeting rooms or creative spaces. This chair owes its slender figure to modern manufacturing methods: high-quality polypropylene is shaped into an ergonomic seating shell with an easy-care and robust surface, promising the highest level of comfort due to its flexible character.

Fiore Wood

FI 7523
+ Armrests AB31APO

FI 7520

The warm natural tones of these chair variations truly help to upgrade any meeting and communication room. Expert-ly processed veneers of beech, oak or walnut wood form a back-friendly multilayer seating shell that provides comfortable yet dynamic support. Customisable upholstery, armrests and chair legs make for a perfect finish. The swivelling wooden model with a four-point base and castors received in 2017 the renowned "Red Dot" award for outstanding design quality.

Fiore Wood (CPL)

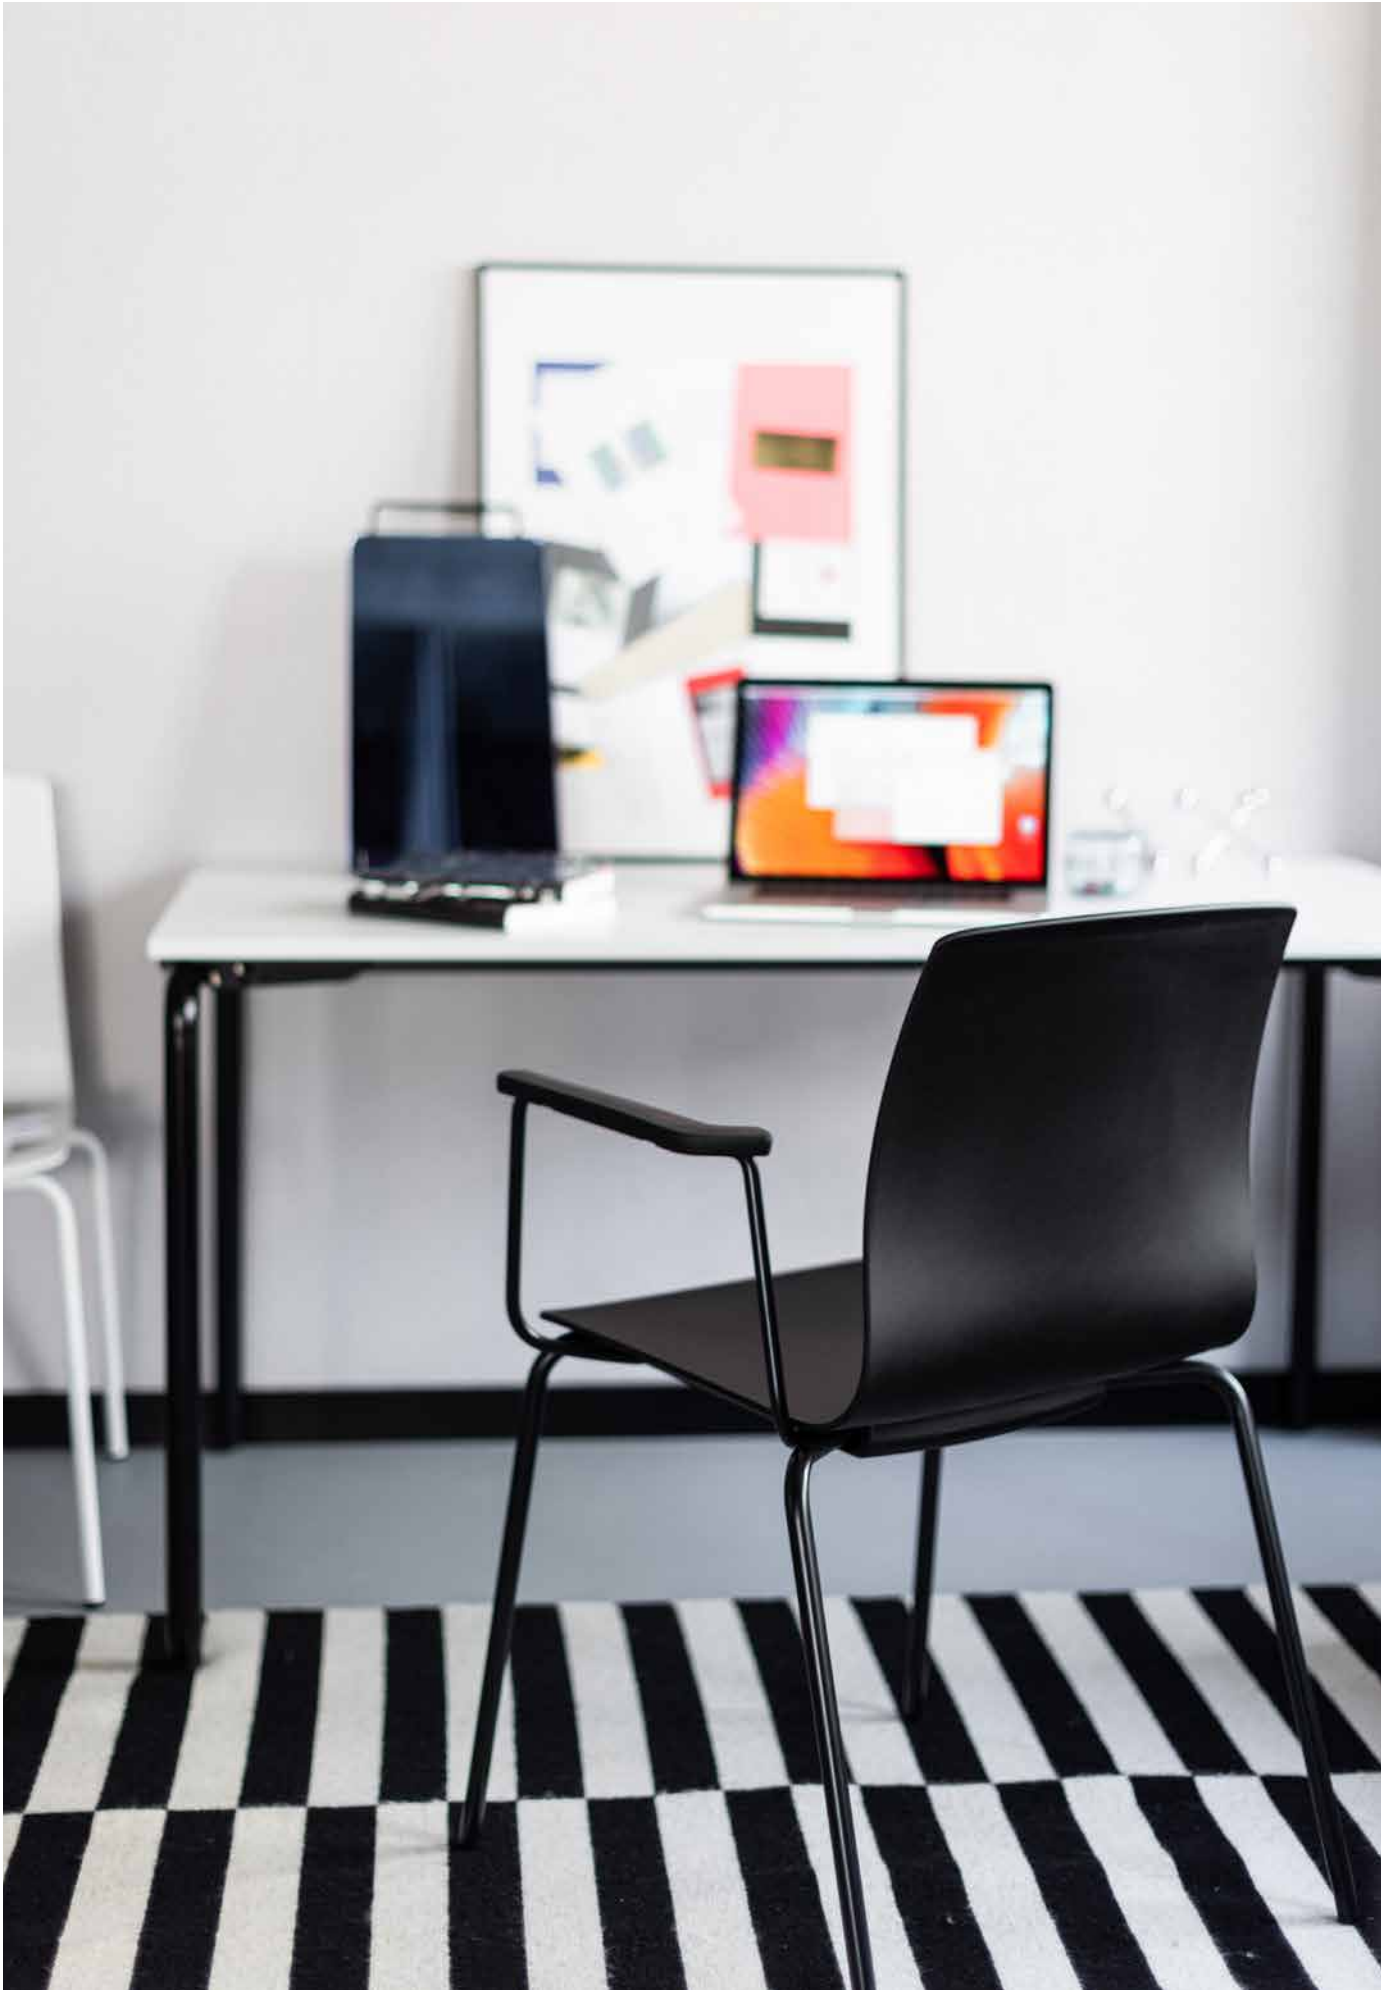

The all-rounder in communication: its timelessly modern design combined with high manufacturing quality make the skid-base chair a popular seat. Boasting a solid CPL seating shell and an elaborately constructed frame, it offers a smart solution for frequently used multipurpose rooms that require seating options that need to be set up spontaneously and quickly.

Fiore black & white edition

The classic black and white colours make a design statement and add a refined look to any interior. Fiore cuts a fine figure with its black or white powder-coated frames and blends elegantly into any office or home environment.

Fiore seminar

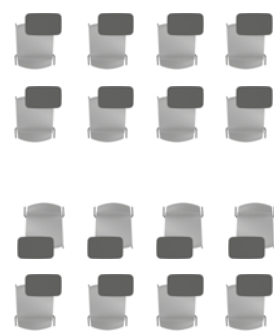

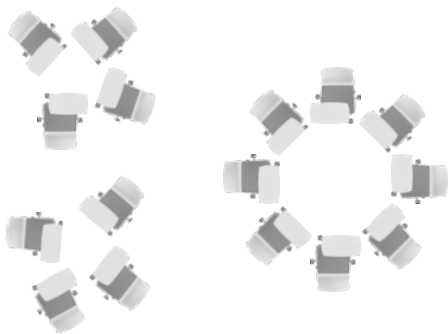

Successful development requires training and an exchange of ideas. That's why it is so important to create the best possible discussion and brainstorming environment for your employees and colleagues. The ergonomically shaped plastic shells provide a high degree of comfort for discerning needs, featuring comfortable upholstery and individually adjustable tables. The Fiore seminar swivel chair has been awarded with the Comfurnacy seal "Future Office Champion" for special future viability.

Fiore outdoor

Does the sun shine on Fiore? Not a problem for the all-rounder which, thanks to its UV-resistant shells and frames, can be used both indoors and outdoors. To match the ten shell colours in total, the aluminium legs are also available in the same colour or anodised aluminium and can also be mixed in any way you want. A good addition for even more seating comfort are the practical, washable upholstered covers from the Sunbrella collection in six matching colours. Simply pull it over the shell and Fiore is protected against dirt and moisture. And it looks chic too!

Fiore outdoor

Fresh air for fresh ideas. Thanks to Fiore outdoor with powder-coated steel frames in graphite black or traffic white, outdoor areas are now also really blooming. The Fiore plastic shells in ten attractive colours are UV-resistant and therefore also suitable for use on the terrace or balcony. Bistro tables and high standing tables with weather resistant HPL table tops complete the range perfectly.

Fiore bar

Modern-day working is no longer confined solely to the traditional office environment. Meeting points, break rooms and reception areas are also being used for meetings, creative in-teraction and daily work. Fiore also cuts a fine figure as a bar stool anywhere.

Fiore bar

FI 7593

FI 7690

Modern community areas as well as cafeterias and meeting zones need clearly designed furniture whose design is classic but contemporary. The Fiore barstools are the perfect solution for any space. The slim wooden shell is available in addition to the whole-shell version in a shortened version. The four-legged version as well as the skid base variant are available in three upholstery variants as well as non-upholstered. The low wooden shell is available in an unupholstered version or with upholstered seat.

FI 7596

FI 7696

Fiore counter

For temporary working or communicating with others: As a counter chair for use at standing tables, Fiore encourages users to switch between standing and sitting and brings greater flexibility and movement to everyday work. Fiore counter can be adjusted easily and quickly to the seat height you want, the horizontal bar acts as a practical mounting aid and ensures a relaxed posture when sitting. Awarded with the Comfurnacy seal "Future Office Champion" for special future viability.

FI 7507_CFB

Fiore Beam

The Fiore bench system is available in a two-, three-, four-seater and even a generously sized five-seater design. Given that it can be flexibly combined with wooden shells or plastic shells as well as centre or end tables, it offers an impressive array of options. Fiore bench models with white MicroSilver BG™ plastic shells are appropriate for use in waiting areas where there are large numbers of people and where increased levels of bacteria are to be expected.

Variety all along the line. The Fiore bench system also offers the perfect solution for any furnishing scenario in waiting and reception areas. Fiore bench with its wooden shell provides a homely feel in reception areas. In combination with easy-care, colourful plastic shells, the benches are also very suitable for waiting areas in public buildings or in doctors' surgeries.

The clear shapes of the Fiore tables naturally match with the chairs. They are available in different variations, offering sufficient storage space. Thanks to their format, the square versions can easily and quickly be arranged for workshops or events, as required. The table tops are available in melamine version or weather resistant HPL version, the frames are available as a chromed version or – depending on the model - also with black or white powder-coating.

Fiore Sustainability

Sustainable working, production and thinking is important to us. From start to finish, from the initial design to waste disposal, our processes are geared to developing high-quality, long-lasting but also environmentally friendly products for you. But we do even more: With the EMAS certification we voluntarily commit to continuously improve our environmental performance. And with the BIFMA level® certification we make it transparent that our products point the way to sustainable furniture, helping to deliver the high demands of LEED certification for sustainable construction.

Company:

Fiore:

Material

- › Over 50 % of all materials used for Fiore are recycled.
- › Fiore is 100 % free of hazardous substances (no PVC, chrome VI, lead or mercury). All polyurethane foam parts are CFC and CHC free. The powder coatings used are free of volatile, organic compounds and heavy metals.
- › Cardboard packaging is made from recyclable material, the polyethylene film for packaging with 30 % share of recycled material. Water-soluble inks which contain no solvents are used when printing paper and packaging materials.

Production

- › The company's environmental management system is certified in accordance with EMAS and DIN EN ISO 14001.
- › Fiore was designed and developed in such a way as to minimize waste, energy consumption and environmental impact.

Transportation

- › Efficient logistics due to own fleet of heavy goods vehicles can avoid running empty vehicles when products are delivered.

Usage

- › Fiore is a durable product because components are easy to replace and retrofit. Changeable upholstery and cushions are used in order to prolong the product life cycle.

Recycling

- › Fiore can be dismantled in approx. five minutes using standard tools.
- › All individual parts weighing more than 50 g are marked and are therefore 100 % recyclable.
- › The cardboard packaging and PE film used in the packaging are recyclable.
- › The manufacturer ensures that the packaging materials are recycled in the correct manner.
