Little Perillo ECO

A CLASSIC FOR THE FUTURE

Future in color

The Little Perillo ECO inspires spaces - it is a sculptural form that combines comfort, aesthetics and environmental awareness. Made predominantly from recycled plastic and available in soft gelato colours, it brings lightness to the room and responsibility to the design. A modern classic for cafés, meeting areas and all places where style and attitude are required.

Design: Martin Ballendat

Little Perillo ECO

NATURAL BEAUTY

Art & Function

A sculpture created for the world's most beautiful cafés and meeting areas - and already a modern classic of interior design. With its organically curved shape and wide range of colours, it is extremely adaptable and blends harmoniously into various design concepts. The Little Perillo ECO combines aesthetic elegance with functional sophistication and creates an inviting atmosphere for creative conversations and relaxed moments.

Whether as a simple 4-legged plastic chair in the cafeteria, as a swivel partner with seat cushion for meetings or as a counter chair: The Little Perillo ECO impresses with its seating comfort and the many different versions, making it a team player and eye-catcher everywhere.

Little Perillo ECO

FREE TO MOVE

Feel the freedom

The Little Perillo ECO is not only a masterpiece of design, but also ready to enjoy the freedom of the outdoors. Whether in the garden, in the outdoor bistro or on the rooftop - it combines stylish elegance with the durability that celebrates outdoor living.

Little Perillo ECO

LOOPED FORM AND FOUNDATION

Sustainability in gelato colours

01

THE FORGOTTEN TREASURES

Valuable plastics lie within the 'yellow bag', brought back to life through targeted recycling.

02

THE FIRST TOUCH

Plastic parts accumulate in many households, which often end up carelessly in the 'yellow bag'.

03

PLASTIC REBORN

A silent transformation begins from plastic: The used parts are chopped up, reduced to fine fragments and freed from residues. The result is 100% recycled plastic granulate - a raw material full of new possibilities.

04

A TOUCH OF COLOUR

The plastic granulate takes on a new identity when it is dipped in bright gelato colours. Soft pastel colours blend with the material as if it were a work of art.

05

NEW LIFE

The coloured granulate made from recycled plastic transforms into an elegant, organic plastic full shell under pressure and heat.

06

FORM MEETS DURABILITY

Seating with character, created for today and tomorrow as a commitment to longevity. Timeless in form, versatile in use and of lasting quality. If something does need to be replaced: Spare parts are available - for a long life in the cycle of things.

07

SEPARATION

At the end of its lifespan, the material can be sorted and recycled back into the material cycle.

Little Perillo ECO

ECO IN 6 BEAUTIFUL COLORS

Gentle variety in pastels

The Gelato colours - Phlox yellow, Tender green, Peach cream and Putty grey - create a harmonious atmosphere, that fills the room with freshness and elegance. Phlox yellow brings a touch of warmth and optimism, while Tender green radiates a calming naturalness. Peach cream adds a delicate summer freshness, and Putty grey ties the ensemble together with a subtle depth that rounds off the room perfectly. Since the recycled base material contains different components, the colours may vary slightly between batches. Small dark specks may also occasionally be visible. These differences are not a sign of poor quality but indicate that sustainable resources have been used. Our classics in the colours Traffic white and Signal grey are still made from recyclable new material.

Traffic White
(~RAL 9016)

Tender Green
(~RAL 140 85 05)

Signal Grey*
(~NCS S400-N)

Putty Grey
(~RAL 060 70 10)

Peach Cream
(~RAL 020 090 10)

Phlox Yellow
(~RAL 260-1)

* The shades Traffic white and Signal grey are made from recyclable virgin material.
