Selvio E

ESSENTIAL LUXURY

The essence of sitting

Selvio E is the entry point into the functional luxury of sitting. Reduced to the essential ergonomic functions, but without concessions to the design quality. The elegant swivel chair models with mesh or fully upholstered backrests prove to be convertible seating solutions for modern offices thanks to the large selection of cover materials.

Selvio E as a fully upholstered model variant brings a pleasant, homely atmosphere into the office world. Functionally reduced to the essentials, but uncompromising in terms of seating comfort. In combination with high-quality upholstery fabrics, Selvio E exudes creative calm and sovereignty.

Selvio task

CHOICES, CHOICES

Functional luxury

Selvio task is a blend of distinctive design and perfect ergonomics. It embodies the appreciation of quality down to the finest detail. Designer Rüdiger Schaack created a truly eye-catching range of swivel chairs for the Dauphin brand. The seat tilt (-8°) and seat depth (7 cm) provide stimuli for straightening the spinal column. The individually adjustable lumbar support allows the office swivel chair to be adapted to any body size. This relieves the back and supports dynamic sitting.

Design: Rüdiger Schaack

Selvio task not only makes a real visual statement; but it also supports focused work with its ergonomic functions. The version with the mesh backrest exudes a modern, futuristic vibe. The elastic mesh fabric Rhythm offers a pleasant climate control effect, especially on warm days in the office. Ergonomically perfect, the Syncro-Motion X® feature offers a harmonious, synchronous movement of seat and backrest.

The slim backrest with its unmistakable design is based on the double S curve of the spine. Ergonomically perfect, the Selvio task is also optionally available with 2F or 5F armrests. The Dauphin Selvio task is visually understated and elegant as a fully upholstered model.

CONFERENCE COMFORT

Designed to fit the body

Dauphin Selvio task doesn't simply stop with its striking lines: Thanks to its excellent seating comfort, the swivel chair is also ideal for representative meeting rooms.

Slim lines, perfectly designed transitions between the aluminium support and designer armrest, body-contoured back curves and a seat surface with multiple seat depths as well as seat tilt adjustment characterise the Selvio task as much as its ergonomic iliac crest support integrated into the seat.

Experience Design

At Dauphin, outstanding design and the highest quality are an integral element of our self-image. Design means crafting timelessly elegant furniture with the utmost comfort for the owner for almost a century. The finest materials underscore this claim and transform it into a physical experience. Products from Dauphin unite their unmistakable design language with the latest discoveries in ergonomics. There is no choice when it comes to the materials used. We always choose the best.
