

X-Code

X-CODE

Subheadline TBD

The X-Code product range offers not only a wide range of functions but also numerous possibilities for individual configuration, with a choice of a mesh fabric or upholstery, trendy or timeless colours and a white or black backrest shell. What is particularly striking about these chairs is the way in which their functions determine their overall styling. The horizontal gaps in the backrest shell not only provide support and allow ventilation but are also the characteristic design feature of X-Code.

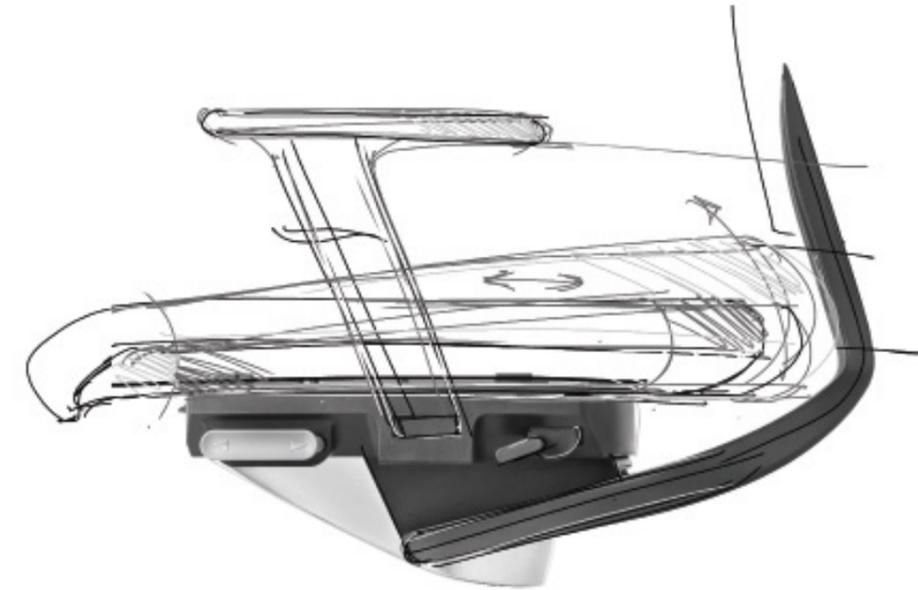

X-CODE

Subheadline TBD

With X-Code, all of the operating components are arranged ergonomically, are easily accessible and are integrated compactly into the Syncro-Motion X® mechanism. The infinite seat-tilt adjustment feature (-2° to -8°) is part of the seat itself. The dial at the rear of the seat shell is the only indication that the chair offers such a function. It enables users to adjust the chair individually when sitting – an important function when it comes to achieving a healthy seated posture.

SX Syncro-Motion X®

- › Side-mounted fine adjustment of the backrest counter-pressure with just a few turns
- › Synchronised seat and backrest movement
- › Backrest tilt angle can be set in 4 positions
- › Option: Infinite seat-tilt adjustment from -2° to -8°
- › Seat-depth adjustment using sliding seat (7 cm)

Subheadline TBD

MicroClima

MicroClima

In order to achieve optimum support for the back, the plastic membrane backrest is complemented by an adaptive slatted structure. An integrated lordosis support provides cushioning across the slatted structure and thus ensures even pressure distribution in the lumbar region. Particularly beneficial for dynamic office workers: the breathable seamless knitted fabric moulds to the back during movements like a second skin. Unlike conventionally upholstered office swivel chairs, the X-Code backrest offers greatly improved breathability and allows an active yet relaxed posture.

MicroSilver

MicroSilver

Unique within the office furniture sector to date: a silver micro-coating on the armrests helps to prevent infections.

QR - Code

X-Code – the chair with a “QR code” – allows the operating instructions to be viewed even when on the move.

On top form

The X-Code backrest features the special, three-dimensional “Wovenit” knitted fabric.

High-performance material

“Wovenit” fabrics are produced from a single yarn in a single step. There is no need for any trimming, stitching or extra pieces.

No waste whatsoever

The material is used so carefully that no waste whatsoever is produced. This saves resources and protects the environment.

Perfect all around!

“Wovenit” has integrated fixing components and no seams or annoying cut edges.

X-CODE

Pure

The entry level model X-Code pure mesh offers ergonomic sitting and excellent value for money. The plastic backrest with a breathable mesh cover in four fresh colours ensures ideal climatic conditions when sitting. X-Code pure style with a tensioned membrane-like slatted structure and a breathable seamless knitted fabric in nine colours provides support for the entire back area for active, fatigue-free sitting.

X-CODE

Pure

The functions of the customisable X-Code office chairs clearly determine their overall styling. The soft, multidimensional backrest fabric ensures optimum climatic conditions and support for the entire back. The horizontal gaps in the white backrest shell provide support, allow ventilation and are an unusual design feature in their own right.

X-CODE

Counter

X-Code as a counter swivel chair is the ideal seating solution for standing- (seat) workstations at high desks. While using load-dependent locking castors the chair is prevented from accidentally rolling away and still movable in case of release. Alternatively, glides offer optimal stability. The height of the non-slip chrome foot ring can easily be adjusted.

X-CODE

Premium

As elegant and sporty as it is ergonomic – the backrest features an impressive combination of a supporting black plastic shell with a high-quality polished aluminium joint to the mechanism, a tensioned membrane-like slatted structure and a special soft fabric. The translucent design is both pleasing to the eye and comfortable to the back, whilst the breathable material complements the overall sophisticated look.

X-CODE

Premium

The X-Code leather version stands out with its distinctive design and genuine handcrafted upholstery. The exquisite leather upholstery is carefully produced with great attention to detail and ensures the ultimate in comfort when sitting. X-Code proves its ergonomic qualities even in the version with an upholstered backrest cushion. The standard lordosis support provides cushioning across the slatted structure and ensures excellent pressure distribution in the lumbar spine area.

Visitor | Conference

X-Code visitor and conference chairs continue the striking design of the swivel chairs and impress with their dynamic, freshly translucent look. The four-legged models as well as the cantilever chairs can be stacked, ensuring that space is used in a flexible manner. The conference swivel chairs with Conference-Relax tilt feature are adjustable in seat height and optionally available with castors or glides.

Subheadline TDB

Just a few adjustments and everything is perfect: the ergonomically arranged, easily accessible operating components for the Syncro-Motion X® mechanism represent an intuitive operating concept.

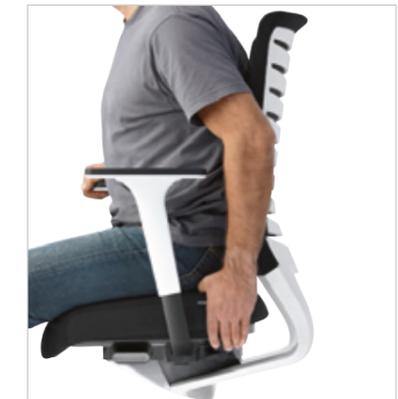

Seat height

Every person is different. Your chair can be infinitely adjusted to meet your needs.

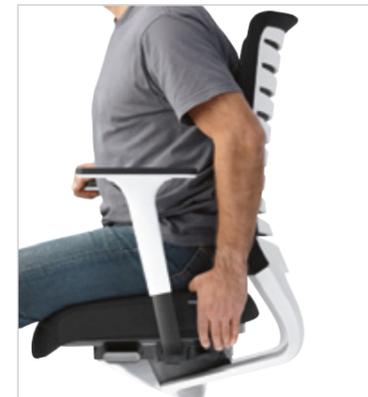

Seat depth

Thanks to a sliding seat, the X-Code offers a 7 cm seat-depth adjustment range.

Seat tilt (option)

Infinitely adjustable from -2° to -8°. For an individual seated posture. (Also in two settings as rapid adjustment facility.)

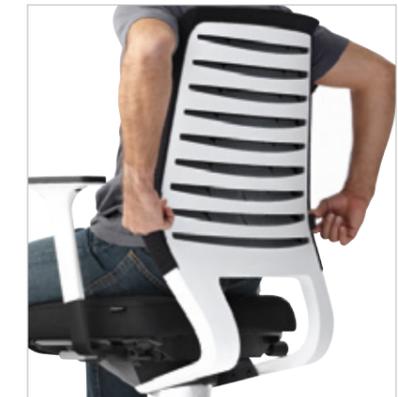

Backrest tilt adjustment

The backrest can be set in four positions, allowing you to relax in perfect comfort.

Backrest counterpressure

Adjust the counterpressure of the backrest quickly and easily while using the pull-out handwheel so that the upper body is upright but not pushed forward.

Lumbar support

Adjust the height of the lumbar support in such a way that it is positioned roughly at belt height. The lumbar support can be raised or lowered by pulling it up or pushing it down with both hands.

Sustainability

Sustainable working, production and thinking is important to us. From start to finish, from the initial design to waste disposal, our processes are geared to developing high-quality, long-lasting but also environmentally friendly products for you. But we do even more: With the EMAS certification we voluntarily commit to continuously improve our environmental performance. And with the BIFMA level® certification we make it transparent that our products point the way to sustainable furniture, helping to deliver the high demands of LEED certification for sustainable construction.

Unternehmen | Company:

X-Code:

Material

- › Over 50% of all materials used for X-Code are recycled.
- › X-Code is 100% free of hazardous substances (no PVC, chrome VI, lead or mercury). All polyurethane foam parts are CFC and CHC free. The powder coatings used are free of volatile, organic compounds and heavy metals.
- › Cardboard packaging is made from recyclable material, the polyethylene film for packaging with 30% share of recycled material. Water-soluble inks which contain no solvents are used when printing paper and packaging materials.

Production

- › The company's environmental management system is certified in accordance with EMAS and DIN EN ISO 14001.
- › X-Code was designed and developed in such a way as to minimise waste, energy consumption and environmental impact.

Transportation

- › Efficient logistics due to own fleet of heavy goods vehicles can avoid running empty vehicles when products are delivered.

Usage

- › X-Code is a durable product because components are easy to replace and retrofit. Changeable upholstery and cushions are used in order to prolong the product life cycle.

Recycling

- › X-Code can be dismantled in approx. five minutes using standard tools.
- › All individual parts weighing more than 50g are marked and are therefore 100% recyclable.
- › The cardboard packaging and PE film used in the packaging are recyclable.
- › The manufacturer ensures that the packaging materials are recycled in the correct manner.
